CSDA Special Districts Mapping Project

California Special Districts Association (CSDA) is proud to announce the launch of a GIS site containing location points and, in many cases, boundaries for the independent special districts in California. Working closely with California CAD Solutions, CSDA staff has been gathering data from all over the state to develop a map that will help raise awareness of special districts. CSDA has taken the initiative in developing a comprehensive, online map of the independent special districts in California.

CSDA's ultimate goal is to have every special district headquarters and boundary lines represented on the map.

The map will serve as a tool in CSDA's campaign to raise awareness of special districts.

To move this ambitious program forward, CSDA has worked closely with California CAD Solutions in gathering, formatting and posting data to the site. CSDA's work is not yet finished. If your district's data is inaccurate or missing boundary lines, please let CSDA know. They would like to correct it. Contact CSDA Member Services (cathrinel@csda.net) if you have any questions or comments.

Districts Stronger Together

Contra Costa Resource Conservation District Welcomes New Manager

**Welcome Ben Wallace as
the new CCRCD
Executive Director**

Ben Wallace brings a wealth of experience to Contra Costa Resource Conservation District (CCRCD). Ben has previously directed conservation education projects at the California Association of Resource Conservation Districts, served as project manager at the California Wilderness Coalition, and worked with the US Forest Service and environmental consulting firms in Oregon and Alaska on forestry, fisheries and stream survey projects. He holds a bachelor's degree from Reed College in Oregon where he specialized in population and conservation biology and public policy.

Ben came to the CCRCD from the Solano Land Trust (SLT) where he had worked from 2005 to 2013 as Conservation Project Manager. At SLT he provided oversight strategies and programs to conserve, manage and restore habitat on Solano Land Trust properties.

The Central Contra Costa Sanitary District Has a New General Manager

**Roger S. Bailey
has been
appointed as the
District's new
General Manager**

Mr. Bailey will succeed Curtis S. Swanson, who has been serving as the interim GM since January 2013. Roger assumed his duties on August 19, 2013.

Throughout his career, Mr. Bailey has led several major municipally owned utilities departments across the United States. He most recently served as the head of the City of San Diego Public Utilities Department, one of the largest and most complex water storage, treatment and delivery systems in the U.S.

Jersey Island Land Irrigation Permit to Reduce Water Quality Monitoring Costs

The new permit granted by the Central Valley Regional Water Quality Control Board to Ironhouse Sanitary District (ISD) makes it easier for the district to use its high-quality recycled water for farming operations on Jersey Island, where it is used to irrigate hay crops. Under the new permit, land irrigation will be for 334 acres.

The estimated annual cost savings comes from reduced water monitoring requirements imposed by the state, mainly because the district's recycled water achieves high standards for purity.

"Nobody else in the area has a facility like this," said ISD General Manager Tom Williams, speaking of the Water Recycling Facility. "It's rewarding for the state regulators to recognize our water quality."

The state-of-the-art plant employs advanced membrane bioreactor technology with UV disinfection, which does a more thorough job of making treated water environmentally safe.

This is important, as ISD sends a good portion of its recycled water to Jersey Island, a 3,500-acre island located between Oakley and Bethel Island. The rest of the recycled water is either stored on-site for later irrigation or released into the San Joaquin River.

Central San Receives National Award for Fifth Consecutive Year

Central Contra Costa Sanitary District's (CCCSD) Purchasing and Material Services team won the National Purchasing Institute's Annual Achievement of Excellence Award again in 2013. This is the fifth consecutive time the team has received this award, which recognizes organizational excellence in procurement, with emphasis on innovation, professionalism, e-procurement, productivity, and leadership.

CCCSD is one of only 23 special districts in the United States to receive this award in 2013, only three of which are sanitary districts.

Solar Panels Expected To Save ISD about \$100K a year

RGS Energy, the commercial and utility division of Real Goods Solar Inc., is deploying a 1.1 MW solar power system at Ironhouse Sanitary District's water recycling facility and administration building in Oakley.

RGS Energy will design, install, monitor and maintain the system, which will use a 1 MW single-axis tracking system and 60 kW carport system. Construction will begin in the fall of 2013 and be completed in the first quarter of 2014.

According to a statement from Real Goods Solar, Ironhouse Sanitary District (ISD) will save a total of \$5.9 million for electricity costs over the next 25 years using the system.

ISD signed a power purchase agreement with Real Goods Solar in an effort to trim escalating PG&E costs over the next 25 years. With the panels, the district estimates first-year savings of about \$95,000, with greater savings in succeeding years.

After several months of investigation, the district decided to make available 5 acres of its land to Real Goods Solar and buy the power at a discounted rate rather than take on the burden of purchasing its own panels. ISD pays nothing to build or operate the panels. Real Goods Solar will install single-axis tracker-style panels that will help power the Water Recycling Facility, as well as mount them on a carport to provide power for the administration building.

Wastewater Treatment and Water Recycling Plant Tours

Dublin San Ramon Services District (DSRSD) offers public tours quarterly on the second Wednesdays of April, July, October, and January. Tours can be scheduled at other times for groups of six or more if staff is available.

The free tour lasts 60 to 90 minutes and is open to adults, teens, and children ages seven and up. The facilities are located at 7399 Johnson Drive in Pleasanton.

Reservations are required. For more information call the DSRSD public information office at 925-875-2282.

Mt. View Sanitary District Bird Walk

On July 6th, 2013 California Special Districts Association (CSDA) Staff joined MVSD Biologist for a Bird Walk at McNabney and Moorhen marshes.

Back Center MVSD Board member and CSDA President Stan Caldwell, front L-R Megan Hemming CSDA Professional Development Director, Kelly Davidson MVSD Biologist, Rick Woods CSDA Administration - Finance Manager, Catherine Lemaire CSDA Member Services Director.

Fifteen bird watchers came for the biologist led walk. Most of the attendees were novice or beginner bird watchers. We saw and identified over thirty different birds, deer, a jack rabbit and a red fox. It was warm but a nice day for bird watching. MVSD will be offering bird walks in October and November and would love to have you come!

See the district web page for more details:

www.mvsd.org

Sherry Sterrett Re-elected to CSDA Board Region 3

Sherry Sterrett, Pleasant Hill Recreation & Park District was elected to another 3 year term as Director for the California Special Districts Association.

Congratulations Sherry! Sherry's hard work, dedication, commitment, and knowledge have enhanced her ability to be an effective and responsible board member. She promotes and encourages education for special district board members and managers. Sherry's legacy of involvement and participation has been an important part of the success of CSDA.

Los Medanos Community Healthcare District Awards Summer Grants

The Los Medanos Community Healthcare District (LMCHD) has awarded summer grants to 10 local agencies to help accomplish health-related goals that include reducing childhood obesity and promoting vitality in East County areas served by the district

The district, which is funded by a 1 percent property tax, distributes community grants to support health and wellness programs that serve residents of Pittsburg, Bay Point: Clyde, Clayton and unincorporated Antioch.

The grant recipients include All Star Cheer Reaction, Sports & Fitness for Kids, City of Pittsburg, Souljahs, APT Sports, and adult education services provided through the Pittsburg Unified School District.

"The Healthcare District's mission is to cultivate a community in which good health may flourish for all District residents. Our community and its residents rely on us to uphold this mission through diverse programs and resources," Bobbi Palmer, the district's chief executive officer said in a statement.

Contra Costa Water District Honored for Safety

Employee safety is a top priority for the Contra Costa Water District. So it's no surprise the District's safety efforts were recognized last fall when it received the 2012 Larry C. Larson Safety Award from the California-Nevada Section of the American Water Works Association.

In June 2013, those same efforts won the Association's national Wendell LaDue Utility Safety Award. These distinguished awards honor utilities that have made employee health and safety a main priority.

CCWD Board of Directors Left to right; Lisa Borba, Karl Wandry, Joe Campbell, John Burgh, Bette Boatman

Measure WW Bonds to be used for Ambrose Park Pool

Improvements are in store for the long-neglected Ambrose Park pool. The board authorized interim general manager John De Lorenzo to take the initial steps needed so that the existing pool and buildings can be repaired with available Measure WW funds.

"We've heard you loud and clear -- the pool needs to be reopened," Steve Hoagland, chairman of the park district's board of directors, said on how best to spend available funds on improvements to Ambrose Park. Building a children's pool fell through last year because bids were too high. The lowest construction bid came in \$700,000 higher than available funding.

Now the old lap pool, which was closed in 2009 for safety reasons, will be repaired and reopened under this new plan. "For the community, I believe a big pool is a lot better, because that's what Bay Point is known for," said Victor Ramirez, who like many locals swam in the pool as children.

While many details need to be worked out, the plan envisions dividing the 33-yard-long pool with a wall to create a 25-yard deep-water pool for lap swimming, with an 8-yard-long shallow pool to be used by young kids, seniors and for children's swimming lesson.

There is about \$1.5 million in funds available that could be used for the pool project. About \$1.1 million is expected to come from East Bay Regional Park District's Measure WW, a voter-approved bond measure.

De Lorenzo pointed out that revenues sources such as swimming lessons will have to be developed to help pay for the costs of operating the reopened pool, which in a best-case scenario could be open by the summer of 2014. "The pool is not going to pay for itself," he said. But, De Lorenzo said it "is going to generate a source and sense of community pride."

Tentative program for January 24, 2014 meeting to include a Central San Tour!

The program for January meeting will also include a tour of Central San Facilities. It will be imperative that we have an accurate head count for the tour by January 2nd, 2014.

Be sure to look at your email boxes in late December for the meeting agenda and RSVP.

East Bay Regional Park District Purchases Roddy Ranch Property

1,885 acres of open space known as "Roddy Ranch" in Eastern Contra Costa County, a key piece in the District's plan for the development of a new regional park in Deer Valle has been acquired. The property is located along Deer Valley Road in the City of Antioch and in the adjacent unincorporated area of Contra Costa County to the south of the city.

"This acquisition is extremely important to the creation of Deer Valley Regional Park. Today is a great day for East County residents who will get a future regional park in their backyard," said Robert Doyle, General Manager.

Envisioned along with the new park is a regional trail that would connect Black Diamond Mines Regional Preserve to Round Valley Regional Preserve.

"The property is a beautiful, picturesque level valley flanked by prominent ridgelines on both sides. It will offer a great opportunity for the public to experience nature and see wildlife at its best," General Manager Doyle added.

Not included in the Park District's purchase but within the acquisition's property boundary are the 230 acre Roddy Ranch Golf Course and four other parcels of 280 acres total that are owned by either the Roddy Family or McCauley Investments.

"The Roddy Family are prominent and long-time ranchers with a vision to see this property enjoyed by future generations rather than be developed," added Doyle. "We can't thank them enough for their partnership."

The Park District will enter into an option to purchase the acreage for \$14.2 million which is the appraised fair market value. Up to 90% of the purchase price will be funded in partnership by the East Contra Costa County Habitat Conservancy with grants from the California Wildlife Conservation Board and a private foundation. East Bay Regional Park District Measure WW land acquisition and capital funding, approved by voters in 2008, will pay for the balance.

Because of the site's important biological resources the Park District plans to place the new acreage into land bank status until a Land Use Plan can be completed for Deer Valley Regional Park.

State Recognition for Local Resource Recovery Agency

Delta Diablo Sanitation District (DDSD) is proud to announce that they have been selected by the California Water Environment Association (CWEA) as California's Mid-Size Treatment Plant of the Year for calendar year 2012. It is the second time Delta Diablo has received this award within the past five years which is unprecedented.

Left-to-Right Nancy Parent, Mayor of Pittsburg & DDSD Board Member, Wade Harper, Mayor of Antioch & DDSD Board Member, Steve Dominguez, DDSD Plant Manager, Federal Glover, District V Supervisor & DDSD Board Member, Gary Darling, DDSD General Manager, and Dennis Laniohan, DDSD Operations Services Manager.

This year's selection was extremely competitive due to the seven other Publicly Owned Treatment Works competitors which were very qualified for the award in the Mid-Size Treatment Plant category.

California
Water
Environment
Association

Recognizing operational and organizational excellence in the wastewater industry, this award also acknowledges the District's leadership in spearheading regional resource recovery initiatives. DDSD is the lead agency for the Bay Area Biosolids to Energy coalition, representing 19 public agencies and recipient of \$1M California Energy Commission funding, looking to maximize the energy available from Bay Area biosolids while minimizing Green House Gases.

Wade Harper, DDSD Board of Director's Chair, confirmed "We are extremely proud to receive this award again and believe it reflects the District's commitment to transforming a traditional local wastewater agency into a modern resource recovery facility which benefits our customers, safeguards the environment, protects public health, and supports regional economic development."

The Pittsburg Chamber of Commerce's Special Recognition Award recognizes the District's commitment to Pittsburg through its wastewater resource recovery services and ongoing involvement in the Pittsburg community programs. Congratulations Delta Diablo!

Biosolids for Energy Research Project

Researchers from Lawrence Livermore National Laboratory and Miami-based Chemergy Inc. will start studying a technology that converts biosolids, or remaining byproduct from wastewater treatment, into hydrogen gas to produce electricity.

The \$1.75 million public-private research project, which officials say is the first of its kind in the nation, will begin next month at Delta Diablo Sanitation District's facility in Antioch. The trial is funded by Chemergy and a grant from the California Energy Commission.

In about a year, it is anticipated Delta Diablo will be processing one ton of biosolid material each day and producing up to 30 kilowatts of electricity, Lawrence Livermore chemist Bob Glass said.

"If it works well, it could be the go-to solution for many wastewater agencies across the nation and the world," said Gary Darling, Delta Diablo's general manager. Historically, biosolids have been used for fertilizer or agricultural land or to cover landfills.

Converting biosolids to energy has long been a goal of the Bay Area Biosolids to Energy coalition, which consists of 19 Bay Area public agencies responsible for wastewater treatment. The group has been soliciting ideas for converting the biosolids into energy, seeing the Bay Area has a potential incubator for ideas.

"We want to use this as a model to encourage the widespread use of biosolids for energy production," he said. "It's a great opportunity for Lawrence Livermore to work with local industry."

CCSDA Newsletter & Chapter Email Distribution List

Your email address is the quickest way to receive important notifications and quarterly newsletters from the Contra Costa Special Districts Association.

If you haven't received your newsletter lately or know of someone who did not receive one, you now have the opportunity to change that!

Has your personal email changed? Please notify Stan Caldwell by email at stan_caldwell@comcast.net.

DON'T BE LEFT IN THE DARK *about what's happening at the local level, get your email on the chapter email list.*

Contra Costa Special Districts Association

**Important Meeting
10:00 AM January 27, 2014**

This will be our annual business meeting, including the election of officers.

Please let the nominating committee (to be appointed and announced at the October meeting) know if you are interested in serving on the chapter's executive committee, becoming an officer of our Chapter.

The officers of the Chapter are an elected President, an elected Vice-President, and an elected Member-At-Large. The treasurer is an appointed position.

Reminder:

Any member district that has not paid their annual dues shall not be in good standing and shall not be entitled to vote on matters before the Chapter.

Each regular member district shall be entitled to one (1) vote on all matters brought before the Chapter membership.

The governing body of each regular member district shall designate, in writing, to the Chapter Secretary (Suzette Crayton), one representative who shall exercise the district's right to vote, and one alternate who shall have the right to vote in the absence of the assigned voting representative.

Please be sure to provide an update if there are any changes before the January meeting.

CSDA William Hollingsworth Award of Excellence

Mr. Hollingsworth was one of the "founding fathers" of California Special Districts Association (CSDA) and was one of the foremost advocates for special districts in the Capitol in the 1970s. Special districts and CSDA would not be what it is today were it not for Mr. Hollingsworth.

In his honor, CSDA recognizes an individual who exemplifies what it means to go above and beyond the call of duty and advocate extensively both for CSDA and special districts. The William Hollingsworth Award of Excellence is not open for nominations by the membership, but is selected by the CSDA Board of Directors.

CSDA President Stanley Caldwell presented the Hollingsworth award on behalf of the CSDA Board of Directors to Bette Boatmun at the CSDA 2013 Annual Conference Luncheon

The Hollingsworth Award is awarded to the individual(s) who has been vigilant in his or her championing for special districts. This year's recipient was Contra Costa Special Districts Association Chair Bette Boatmun of the Contra Costa Water District.

As dedicated public servant, Bette has served with distinction on the Contra Costa Water District Board, and the Contra Costa Chapter of California Special Districts (CCSDA). Bette is the rare impartial and unbiased public official. She has a well-deserved reputation for being thoughtful, measured and well-read on issues of importance to the State of California, the Contra Costa County Special Districts Chapter, California Special Districts Association (CSDA), and the local communities of Contra Costa County.

Bette has been the chairperson for the Contra Costa Chapter Special Districts Association since 1997. As the current chair of Contra Costa Special Districts Association she says "We started small and local, exactly following the premise that all politics is local, and after successfully defending our revenue, the association grew in size and influence. Today there is ample recognition that special districts are indeed the third leg of local government."

Bay Area Clean Water Agencies New Executive Director

David Williams President Pro Tem of Central Contra Costa Sanitary District's Board of Directors has been selected from numerous outstanding candidates to be the Bay Area Clean Water Agencies (BACWA) new Executive Director.

Mr. Williams is a well-respected, long standing member of the clean water community and has provided more than a decade of service to BACWA as an Executive Board member and alternate.

As the Director of Wastewater at East Bay Municipal Utility District he has managed a staff of approximately 300 professionals and technicians and has been responsible for operation and maintenance of the entire wastewater system. Mr. Williams has over 35 years of industry experience which includes working as a consulting engineer and serving the last 25 years in the public sector.

He is active in local, regional, state, and national professional organizations and sits as a Board member of the National Association of Clean Water Agencies (NACWA), the California Association of Sanitation Agencies (CASA), and the San Francisco Aquatic Science Center. He earned his BS in civil engineering and MS in sanitary engineering at Purdue University and has an MBA from University of California, Berkeley.

DSRSD Celebrates Central Dublin Recycled Water Project

Dublin San Ramon Services District (DSRSD) celebrated its Central Dublin Recycled Water Project by turning on the new purple sprinklers at a city park retrofitted to use recycled water. The project extended recycled water pipelines by 1.5 miles and retrofitted irrigation systems at parks and schools in Dublin's oldest neighborhoods.

"Water recycling plays the leading role in the water conservation story in Dublin and San Ramon," said DSRSD Assistant General Manager and District Engineer David Requa. "Nearly 20 percent of all the water used in the District in the last year was recycled, and that number will only go up as we complete more

retrofits like the Central Dublin Project. Because our community has embraced recycled water, we are already meeting the state's 2020 goal to reduce potable water use by 20 percent per person."

More than 70 people came to the event, representing the employees, partner agencies, and contractors involved in the project. Dublin's mayor, two City Council members, city manager, and parks staff attended, as well as the Dublin Unified School District superintendent and several of his staff. Joan Buchanan Dublin's State Assembly member, and Dublin's U.S. Congressional Representative, Eric Swalwell, sent staff representatives to acknowledge the benefits of water recycling to the community.

Representatives of the California Department of Water Resources, US Bureau of Reclamation, and Zone 7 Water Agency also attended and were recognized for providing project funding. Grants paid about 25 percent of the project's \$3.9 million cost. Delta Diablo Sanitation District represented the Western Recycled Water Coalition, which was involved in obtaining project funding.

KGO Radio Reporter Leslie Brinkley interviews DSRSD Assistant General Manager and District Engineer Dave Requa about the benefits of retrofitting parks and schools to irrigating with recycled water, at the event celebrating the Central Dublin Recycled Water Project on July 29, 2013.

State, federal and local grants were obtained to fund the Central Dublin Recycled Water Project. The event took place at Kolb Park in Dublin, one of the sites retrofitted to use recycled water for irrigation.

Central San Accounting Team Wins 13th Excellence Award

Central Contra Costa Sanitary District has been awarded its 13th consecutive Certificate of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association of the U.S. and Canada! This is the highest form of recognition in the area of governmental accounting and financial reporting.

Special District Leadership Foundation Scholarships

Are you or others at your district unable to attend CSDA professional development events and programs due to limited budgets? The Special District Leadership Foundation (SDLF), an independent, non-profit 501(c)(3), formed to promote good governance and best practices among California's special districts, has created the new 2013 Educational Allowance Fund to provide up to \$20,000 in scholarships to individuals in special districts with annual operating budgets of under \$5 million. Scholarship funds are limited to a maximum of \$1,500 per district.

Applicants must submit a scholarship application along with a brief description of why they believe it would be beneficial to receive the scholarship and any additional special circumstances or items for consideration by the scholarship committee. Priority will be given to first-time attendees at specific events and programs.

The funds do not cover any travel, meals or lodging. Educational Allowance Funds can only be used for the fees associated with qualifying CSDA and SDLF events and programs.

For more information: www.sdlf.org or call Charlotte Lowe, 916-231-2939.

Update on West Nile Virus

Continuing to find dead birds is a reminder of disease threat for the West Nile virus, which is still active in Contra Costa County with high infection rates also being found in neighboring counties according to the Contra Costa Mosquito & Vector Control District.

"Dead birds testing positive for West Nile virus indicates that virus is still active in the area," said Deborah Bass, public affairs manager for the District. "Several nearby counties have high infection rates at this time. Clearly it's a reminder to stay diligent in the war on mosquitoes by dumping out standing water and wearing mosquito repellent from dusk and into the evening."

Since 2005, 44 people in Contra Costa County have been diagnosed with West Nile virus. In 2006, two people died from the disease. Recent studies have shown that the majority of cases are not diagnosed and grossly under reported. For 2013, a total of 12 groups of mosquitoes, 62 dead birds and five chickens have tested positive for the virus.

Reflections on the CSDA General Manager Leadership Summit

Bobbi Palmer, CEO of Los Medanos Community Healthcare District had the opportunity to attend the CSDA General Manager Leadership Summit in July on a scholarship. Bobbi learned about the SDLF Scholarship program while attending CSDA's Legislative Day in Sacramento where it was announced there were grants available to attend General Manager Leadership Summit through the Special Districts Leadership Foundation (SDLF) and a grant from Wells Fargo. Bobbi indicated to qualify for a grant it was a very simple process; she filled out an application that was straightforward and quick.

When asked about a highlight of the conference she said she found the workshop entitled, "Effective use of Social Media for Special Districts", quite helpful. She was able to utilize the information once she returned back from the conference to start thinking about the effectiveness of creating a Blog.

One of her favorite speakers was Martin Rauch. His presentation on "How to Build and Maintain Community Support" really inspired her as a CEO to view how she communicates in a slightly different way. The piece about how best to identify your stakeholders as well as building coalitions and support hit home. Bobbi said "Our district is in the process of expanding our stakeholder base and this valuable information was "spot on." I used the information to create a need for conducting an environmental scan as part of my 2014 Management Plan".

When asked what do you think makes the GM Leadership Summit different from other events? She responded "The vast and divergent special districts represented provided me with a wealth of information. Los Medanos Community Healthcare District is a healthcare focused organization. To hear what my colleagues contributed to the conversation whether sanitary or water gave me a different perspective of core services. I truly enjoyed interacting with other special district leaders".

When asked would you attend again? The response was "Absolutely! I feel I've gained more friends and look forward to the next General Manager Leadership Summit".

Pollution Prevention Billboard

Mt. View Sanitary District (MVSD) and Central Contra Costa Sanitary District have teamed up to sponsor a pollution prevention billboard. The billboard could be seen going northbound on 680 freeway just prior to Marina Vista exit.

Pollution Prevention Week is the third full week in September each year. This time is an opportunity for individuals, businesses, and government to emphasize and highlight their pollution prevention.

Exploring innovative means for public outreach, MVSD has leveraged its highly visible geographic location and negotiated with ClearChannel for the annual use of the billboard as part of the contract to install billboards on MVSD's plant site. This public-private partnership enabled MVSD to expand its public outreach beyond its service area at no additional cost and to partner with other agencies about pollution prevention (P2) efforts.

Each Spring MVSD puts up a billboard in May during American Wetlands Month the spring 2013 billboard is shown below.

If you print this please recycle later!

Pleasant Hill Parks & Recreation Bond Project Updates

The Community Center is progressing well. Bob Berggren says "The new Community Center is very exciting...I just toured it the other day it's going to be a fantastic facility! If all goes well it should be completed in late December, with the grand opening in January of 2014".

Pleasant Oaks Park work is also progressing well.

Photo progress of the new Community Center and Pleasant Oaks Park projects can be seen as weekly updates on the districts website under the tab Bond Info > Construction Updates.

District Website <http://pleasanthillrec.com/>

Thank you Central Contra Costa Sanitary District (CCCSA) for continuing to host the Contra Costa Special Districts Association (CCSDA) and agreeing to provide administrative service and support to CCSDA.

We greatly appreciate the work and services that Central San provides.

Please send your district news releases to Stan Caldwell to keep us informed about all of the exciting things your special district is up to. We always welcome your news contributions to our newsletter!

Newsletter Editor Email: stan_caldwell@comcast.net

Mark your calendars with our future Chapter Meeting Dates:

October 21, 2013 * January 27, 2014 * April 21, 2014 * July 21 2014 * October 20, 2014

Meetings begin at 10:00 AM – we are out by Noon

We meet at Central Contra Costa Sanitary District, 5019 Imhoff Place, Martinez, CA.
